

A quick guide to creating your family through Family Matters Surrogacy

Many couples struggle with infertility. Due to numerous medical reasons, women globally are unable to conceive naturally; that is when couples turn to other methods. Not being able to conceive naturally can be heartbreaking and impact relationships for couples. The disappointment of seeing the negative line on a pregnancy test every month alone can be stressful. If you are facing this situation, then do not worry. There is hope for you, and that hope is Family Matters Surrogacy.

Surrogacy

Couples, when exploring options for having a family, you may come across the term “surrogacy” or “family surrogacy.” Surrogacy is when intended parents use the help of a gestational carrier to carry their baby/babies for them. Surrogacy is intended to help families that cannot carry a pregnancy on their own.

Gestational carriers also known as Surrogate Mothers, are transferred embryos that have been prepared in a lab through IVF. The embryo and sperm can be that of the parents to be or sometimes using donors if the Intended parents are unable to provide this genetic material. [san diego surrogacy](#)
